

◆ About Paco Bike

Hello, every bike hobbyist. We would like to introduce ourselves to you. This is Paco Bike. We focus on high-quality product. Our product line includes MTB, DH, ROAD Bike, and Track series. We have road bikes, 20", 24", 650C, and 700C, in full range. Especial in 20" and 24", the frames' geometry are designed for children's body. We've also considered that the muscular endurance of children are not as strong as adult, thus we designed our own ratio of chainwheel and freewheel, which are able to adjust to suit children. I probably won't say we are the only one who can supply the full range Road bikes in the world, but we are absolutely the first one.

I would like to mention especially about our wheel sets. We have the full-equipped for quality inspection. Unlike most wheel designs, Paco Bike truly innovates. The balance of aerodynamics, lightweight and rigidity, plus Paco Bike's peerless manufacturing standards, has created faster wheels for all styles of riding, on more types of road. This is the value of Paco Bike's wheel sets.

Besides our wonderful wheel sets, kid bike is another perfect product of Paco Bike. Our kid bike, PR-20 & PR-24 let you share a world of fitness and fun with your young road racer. These 20 & 24-inch-wheel bikes look and go just like your favorite pro steed. They boast a triple-buttet 6061 T6 aluminum frame for that race- ready feel and weight, and fine designed aluminum fork for outstanding cornering precision. Plus, the Shimano components place shifting and braking control at your youngster's fingertips, so smooth pedaling and control become second nature. Thus, PR-20 and PR-24 models both feature geometry and components specially adapted to young riders. They would be a fantastic choice for kids.

Our track series are also excellent designs. We, Paco Bike, keeps our principle— quality and customers first, and never keeps a slack hand on severe quality control. The Track Frame manufactured by Paco Bike stands for the top quality and safety all the time. Paco Bike also has it own business model to make Crmo & Steel Lug Frame, and always insists on importing the highest standard cr-moly to construct the main structure of our Track Frame. We always tries to make our users eye- popped in this competitive market. By using Cr-mo steel for making Cr-mo Frame, Paco bike has the confidence with our material- procurement policy, ambitiously to achieve our buyers' satisfaction with the best-quality materials in higher density, durability and strength than other frame materials. That's the way that Paco Bike can offer users more lively choices with our multi-functional Track Frame.

With corporate philosophy of service, quality, innovation, and constantly improved service system, Paco Bike aims to develop products with the best ergonomic and highest quality. We have full confidence that we will meet all your requests. Thus, In case of any sample request, always contact us when you need.
